**Subject:** Re: Dimock release

Brian,

We released this statement yesterday via email to reporters who had called this week and last to get initial water test results. Numerous reporters have now asked that we include them on future notifications, since we will be releasing summaries of the test results as they are confirmed. I will include you. Also, we may decide to post this week's summary and future summaries to EPA's website since there is a high volume of inquiries.

Roy Seneca is the other EPA press officer you can contact for info on Dimock. -- Terri

On Jan. 19, as a result of requests from residents and a review of the data we had in hand, EPA announced it would perform water sampling at approximately 60 homes in the Carter Road/Meshoppen Creek Road area of Dimock, Pa. to further assess whether any residents are being exposed to hazardous substances that cause health concerns. The first round of sampling results is now available for the first 11 homes that were tested during the week of Jan. 23. Sampling results from these 11 homes did not show levels of contamination that could present a health concern. Samples from six of the 11 homes did show concentrations of sodium, methane, chromium or bacteria, but concentrations were all within the safe range for drinking water. The sampling results also identified the presence of arsenic at two homes. Out of the 11 homes tested, there are currently three homes receiving an alternate water supply provided by EPA. EPA will continue to provide water to these homes while we perform additional sampling to ensure that the drinking water quality at these homes remains consistent and acceptable for use over time. EPA is also taking a second round of samples from the two homes where arsenic was detected, and although the levels meet drinking water standards, we will resample to better characterize the water quality of these wells. After receiving results from the second round of sampling, EPA will re-evaluate the need to continue providing an alternate water source. EPA has offered to meet with all the residents to go over their data and answer any health-related concerns. As further quality assured data becomes available for the remaining homes, we will share with the homeowners in an expedited manner. Our actions will continue to be based on the science and the law as we work to help get a clear picture of water quality for these homes in Dimock.

**Subject:** Dimock release

Afternoon Terri,

I cannot find the release about initial water testing in Dimock on the EPA region 3 site. Am I missing something? Or was this information the region 3 team only sent out to a select group of reporters?

Thanks,

Bryan Schutt
